Coming Fall 2019
You thought all goat cheese was soft! These block cheese creations are perfect for anything you put cheese on and were one of the few in the US offering truly delicious clean flavored block cheese, free from the goaty twang the others bring. We use this same exact cheese for our mac and popcorn blends, and it tops delicious homemade pizzas like none other.

**INGREDIENTS:**

**Goat Cheddar Cheese:**
Whole Pasteurized Cultured Goat Milk, Salt, Enzymes (Non-Animal).

**Goat Mozzarella Cheese:**
Whole Pasteurized Cultured Goat Milk, Salt, Enzymes (Non-Animal).

**Goat Pepper Jack Cheese:**

**Confuzed: Cow Milk & Goat Milk Cheddar Cheese Blend:**
Whole Pasteurized Cultured Cow and Goat Milk, Salt, Enzymes (Non-Animal).

Epic Source Foods was founded on a labor of love by my family in Frisco, Texas using premium ingredients and Wisconsin goat milk. What began as an ice cream company for lactose sensitive consumers, became so much more! Now Epic Source is part of the Karlin Foods Group after being acquired by our mentor who worked with us bringing our vision to life and beyond. The Karlin Group immediately brought us to scale to meet the growing demand and now we’re launching deluxe dinners, microwave cups and more. Once we truly understood the important impact we have on peoples lives with our “Real Dairy” options, we knew we could find ways to do even more; thus our Planet Harvest brand is set to launch soon!

The reason mothers fell in love with us is that we bring real nutrition and a tummy-friendly source that most people in the US never really understood or had access to. Goat milk fat globules are 90% smaller than a cow milk globule (compare a marble to an orange) making goat milk easier to digest. Cow milk is predominantly A1 milk and Goat milk is A2 milk, worth the time to research! Goats are born at 6-8 lbs. and grow to be 140-160 lbs., sound familiar? Cows are born at 80-120 lbs. and grow to 1600-2000 lbs. Which matches your body best? With cow milk declining and plant “pretend” dairy missing the mark on taste, texture and nutritional value, it’s no secret that goat milk accounts for almost 70% of ALL milk consumed in the WORLD! Look for our new product launches that carry the same commitment to quality and great taste made with ingredients you recognize and trust. “Welcome Back to Real Food.”
